

Eckermann – Engineering with Soul. Our Path. Our Belief.

## The Challenge

## Home starts here

Every roller shutter system depends on its components – precision, quality, reliability.

---

We live in a time of constant change: energy is used more consciously, living spaces are designed smarter, and the concept of “home” is being redefined. Today, people expect more than pure functionality – they are looking for safety, comfort, and a sense of trust. At the same time, our industry faces significant challenges:

- ❑ Energy efficiency and sustainability are now fundamental requirements
- ❑ Customers expect comfort, design, and quality – without compromise
- ❑ Skilled labor shortages and supply chain constraints increase complexity
- ❑ Digitalization reshapes development, production, and collaboration

These challenges are reflected in every detail – in every component and every production step. This is exactly where we begin: with precision, experience, and the ambition to transform individual parts into reliable systems.

Craftsmanship. Precision. Heritage.

## Tradition that lives on

[Experience that endures.](#)

---

Our story begins with small details that create big impact – handcrafted tube clamps that have stood for precision and reliability across generations. Each component reflects craftsmanship, care, and the understanding that quality must last for decades. This mindset has led us into demanding industries where reliability is essential – including the chemical sector, where we have worked for many years with leading manufacturers. In environments where every detail counts.

### Highlights of our tradition

- ▣ More than 125 years of experience in craftsmanship and manufacturing
- ▣ Proven materials combined with precise engineering
- ▣ Passion and care in every detail

*„With this experience behind us, we design solutions that connect people, values, and technology.“*

## Setting new standards

Systems that define benchmarks – innovative and reliable

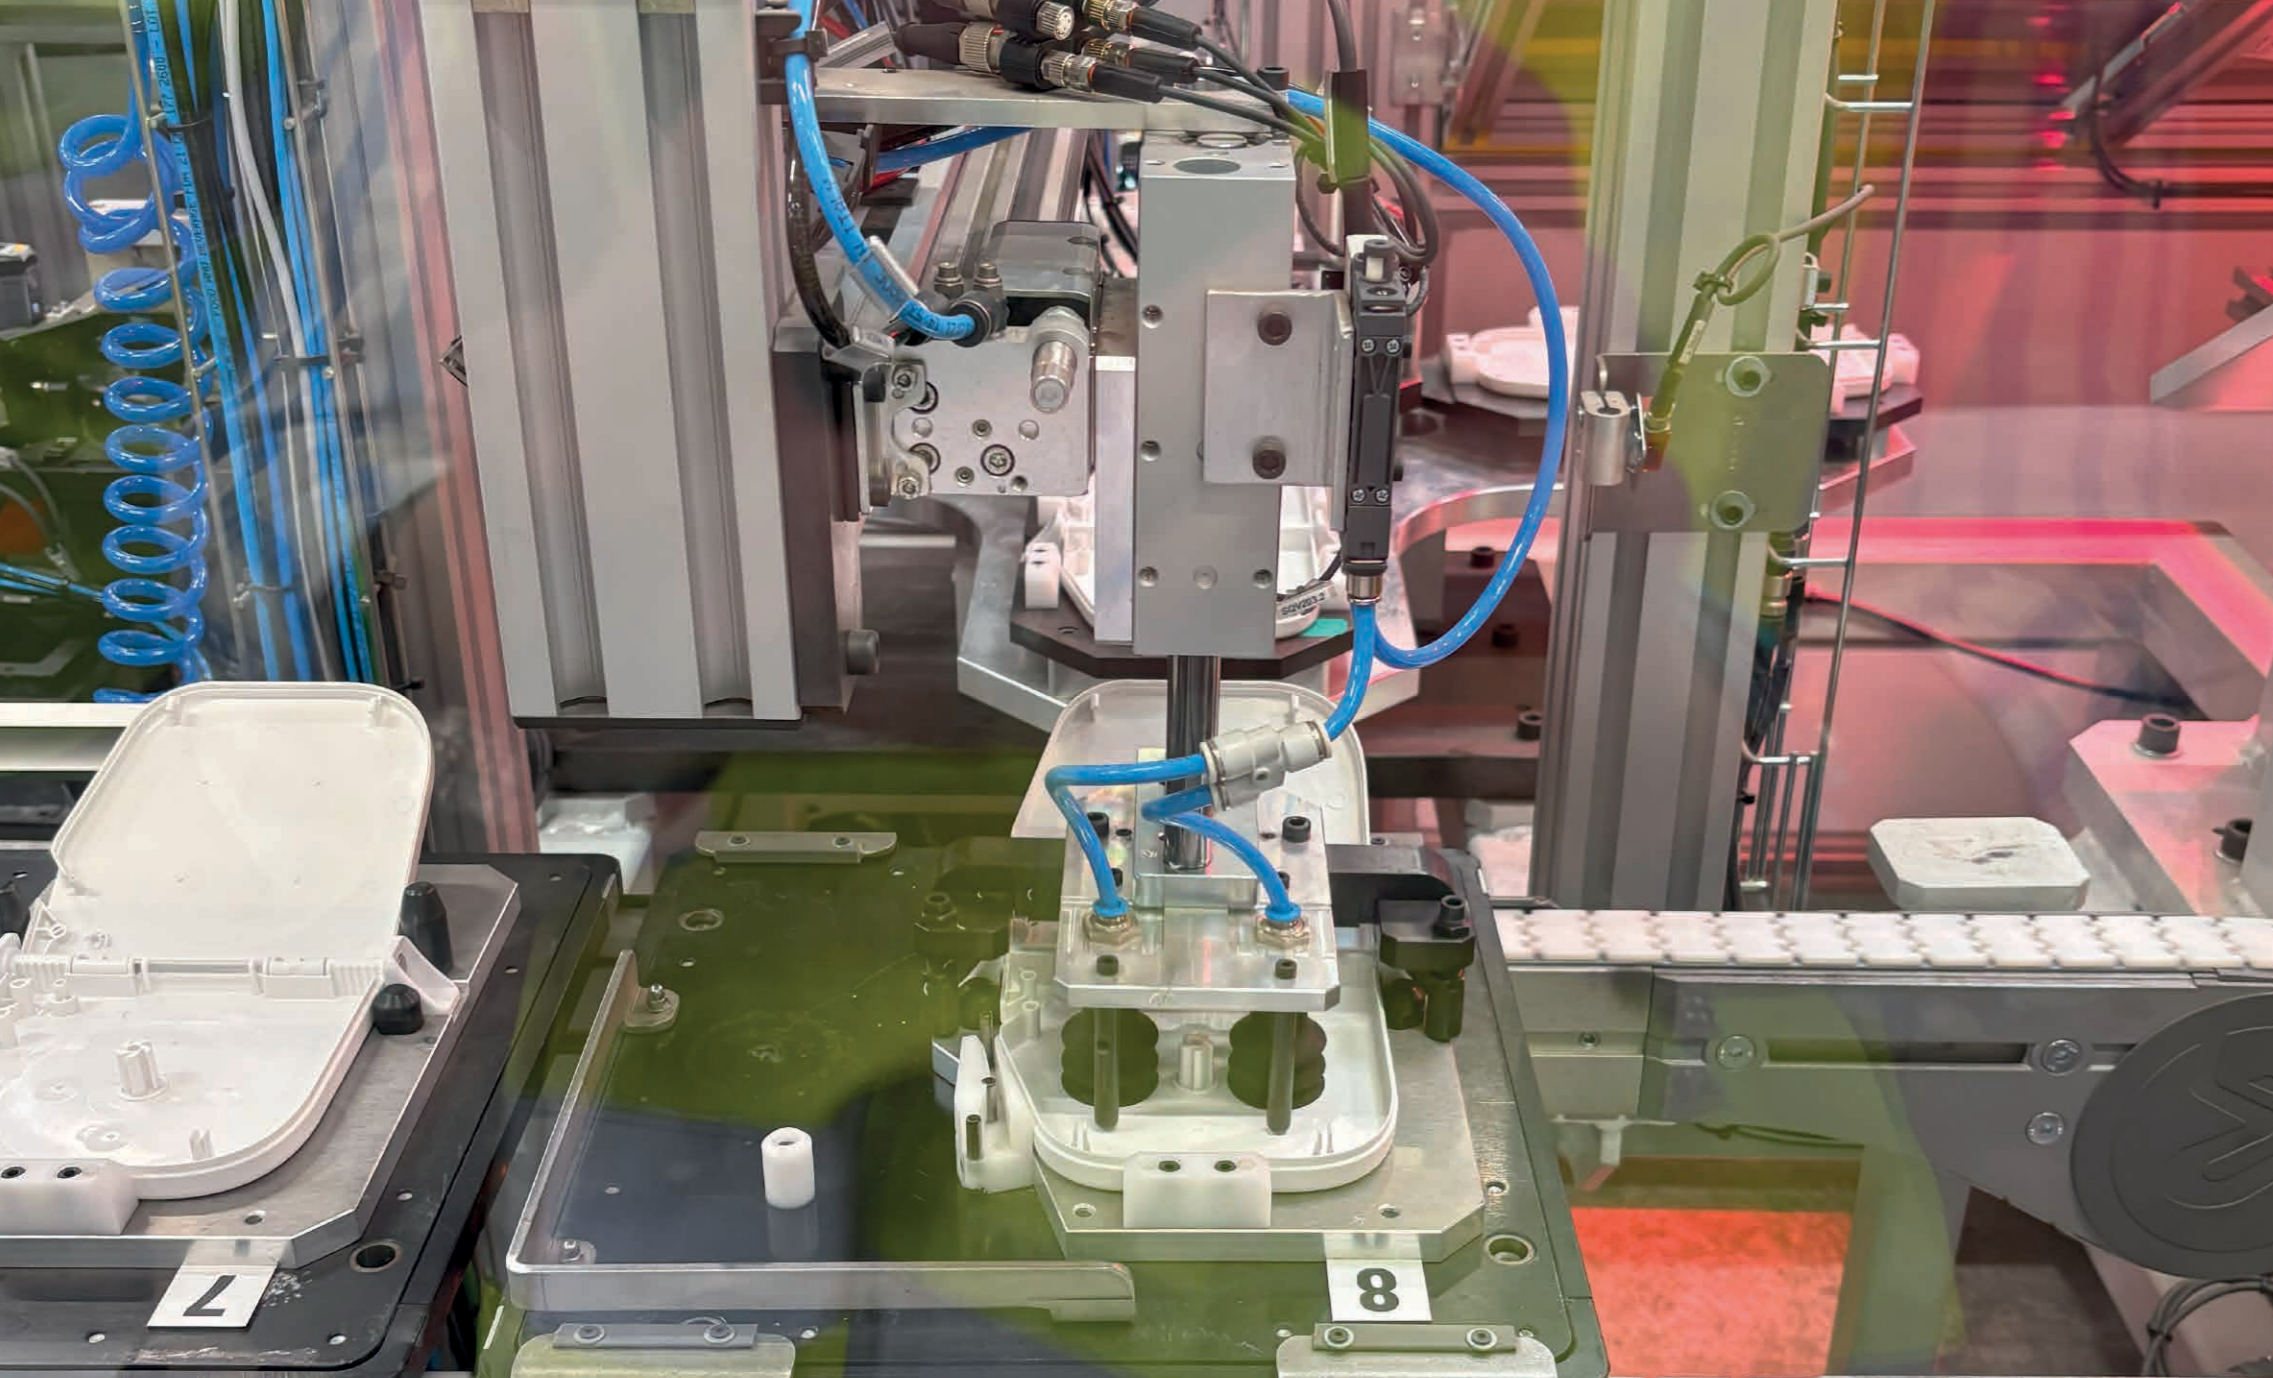

---

We combine this long-standing tradition with modern engineering and innovative materials. The result: systems that are durable, dependable, and forward-looking. We learn from experience, rethink the familiar, and develop modular solutions – this is our philosophy.

### Our vision for the future

- ▣ Innovative materials for highest quality standards
- ▣ Smart solutions for modern applications
- ▣ Products that are timeless, reliable, and future-oriented

Innovation. Systems. Reliability.

## Tradition meets future

We support our partners – reliable, experienced, grounded.

---

- ▣ More than 125 years of experience in the roller shutter industry
- ▣ Quality “Made in Germany” across two production sites
- ▣ Personal support and trusted partnerships
- ▣ Comprehensive know-how – from single components to system solutions
- ▣ Support that drives projects forward

## People. Values. Solutions.

What we create stands for precision, quality, and reliability.

---

- ▣ High-quality materials and precise manufacturing
- ▣ Technically engineered, durable products
- ▣ Modern production technologies and efficient processes
- ▣ Solutions for every installation situation
- ▣ Quality you can see, feel, and trust

Our Team

## A window into the future

Our strongest asset: the people behind Eckermann..

---

- ▣ Dedicated employees with expertise and passion
- ▣ A team combining experience and fresh ideas
- ▣ Flat hierarchies and strong cohesion
- ▣ Close collaboration with customers and partners
- ▣ Together we create reliable solutions

*„Our strength lies in our people – and in what we achieve together.“*

## More than technology

Engineering with soul – because we believe in the meaning of home.

---

- ▣ Passion for products that improve everyday life
- ▣ Attention to detail – from component to series production
- ▣ A strong link between tradition and innovation
- ▣ Highest care in development and manufacturing
- ▣ Our drive: earning trust – every single day

*„Engineering with soul – tradition meets innovation  
for systems that inspire and endure.“*

Eckermann – Engineering with Soul. Our Path. Our Belief.
